

rev.00\_02.2024-EN/2024

EVOCLEANER is the line of cliché-washing machines developed by Ulmex for the letterpress, flexographic and corrugated market. They guarantee the total removal of any ink and varnish over time.

Innovative technical solutions, engineered by Ulmex.

## Models

<b>Evocleaner E</b>	The basic detergent model. Developed for those who want quality at an affordable price.
<b>Evocleaner D</b>	Advanced, detergent model with built-in intelligent functions that automate the process, simplifying and personalizing the user experience.
<b>Evocleaner S</b>	ATEX-certified model in every component, it is the ideal solvent machine for those who distil and want to cut down on consumable costs.
<b>Evocleaner V</b>	Vertical detergent plate washer model, alternative to Evocleaner D, suitable for corrugated board printers. Includes a powerful plate drying system.
